Title: NSPS for Automobile and Light Duty Truck Surface Coating Operations
(Renewal)

ICR Numbers: EPA ICR Number 1064.17, OMB Control Number 2060-0034

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart MM. Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Respondents/Affected Entities: Owners or operators of facilities that conduct automobile and light duty truck surface coating operations

Estimated Number of Respondents: 60

Frequency of Response: Initially, quarterly, and semiannually

Estimated Total Annual Hour Burden: 175,195. "Burden" is defined at 5 CRF 1320.3 (b)

Estimated Total Annual Cost: \$17,067,068, which includes \$16,963,868 in labor costs, \$1,700 in capital/startup costs, and \$101,500 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase in burden for both the respondents and the Agency from the most recently approved ICR. The adjustment increase reflects an increased number of respondents subject to the standard since the last ICR. This ICR uses updated data from OTIS in estimating the respondent universe, which is consistent with the projected industry growth in the previous ICR. This ICR also uses updated labor rates in calculating all burden costs, thus the overall result is an increase in labor hours, labor costs, as well as in total O&M costs

This ICR corrects a mathematical error in calculating the number of responses. Furthermore, we corrected the number of sources that are required to maintain continuous monitoring system (CMS) in Table 1, line item 5. This ICR assumes that all sources incur costs associated with CMS and data management systems, which is consistent with the methodology used in calculating O&M costs. These changes also contribute to an increase in the number of total responses, as well as an increase in labor hours and costs.
